# OIL SPILL SIMULATION

ISS PALUMBO

- The two vessels immediately proceeded to the after section of Saipem 10000.
- Raptor had the Emergency Oil Pollution kit ready and on standby.
- Both vessels started their Fire monitors and started breaking up the fuel.
- Raptor asked permission to proceed within the 500 m exclusion zone to use there propeller wash to increase the breakup of fuel.

ISS PALUMBO

- Saipem 10000 informed Authorities of the spill, while both security vessels kept moving with the fuel slick, spraying with fire monitors.
- At 12:20 PM fuel slick was not visible anymore and both vessels were instructed to move 2 to 4 NM SE of Saipem 10000 to ensure that no fuel slicks escaped.
- Nothing was found and security vessels proceeded back to their respective patrolling sites.
